We are Zimmerman Design.

We are excited about helping companies present attractive marketing materials to their clients.

We are a small business.

We strike a strong balance between having enough personnel to be able to cover a wide range of services and meet deadlines, and having the personal feeling of a small company that cares about every customer.

We major in visual design.

Whether we're designing websites, look books, or anything else, we are artists. This means an attractive look is high on our priority list. When you hand your beautiful brochure to your potential customer, we want it to be with satisfaction. When your client lands on your website, we want them to be engaged from the first.

Andrew Schwartz
BRAND DESIGN
GRAPHIC DESIGN

We are Christians.

For each of us, our relationship with our Lord is of great importance. We want the light of His presence to surround everything we do, and fill our work with meaning. This also means there are certain projects we will politely decline.
